Liquids, A statistical theory of—165 (résumé)
Liquids, Conduction of electricity in highly insulating—632 (résumé)
Long-chain, Viscosity of dilute solutions of long-chain molecules. V. Dependence on the solvent, M. L. Huggins —246
Lubrication addition agents, Radiosulfur tracer study of sulfurized, G. L. Clark, S. G. Gallo, and B. H. Lincoln —428
Lubrication by thin metallic films and the action of bearing metals, F. P. Bowden and D. Tabor—141
Lubrication, Studies in, XI. Temperature behavior of journal bearing systems, M. Muskat and F. Morgan —234; XII. Friction behavior during the slip portion of the stick-slip process, J. B. Sampson, F. Morgan, D. W. Reed and M. Muskat—689
Luminescence of valve metals during electrolytic oxidation, S. Anderson—601

Machine parameter, Negative resistance as a, G. H. Fett —674
Magnetic circuits and transformers, Electrical Engineering Department of M.I.T.—561 (review)
Magnetism, The interior of the earth viewed in relation to earthquake causes. IV. Measurements of terrestrial magnetism tell us little about earthquakes but may tell us much about the interior of the earth, W. A. Lynch— 127
Magnification calibration of the electron microscope, E. F. Fullam—677
Mass absorption coefficients for wave-lengths shorter than the K critical absorption wave-length, Probable x-ray, J. A. Victoreen—95
Mathematical methods of applied physics as exemplified by application to Saint-Venant's torsion problem, Approximate, T. J. Higgins—469; Erratum—705
Mathematical tables, Federal Works Agency, W.P.A. for the City of New York—368 (review)
Mathematics of physics and chemistry, The, H. Margenau and G. M. Murphy—564 (review)
Mathematics, What is, R. Courant and H. Robbins—366 (review)
Measurements, Hardness and hardness, S. R. Williams— 220 (review)
Mechanical synthesizer to solve trigonometric and certain types of transcendental equations, and for the double summations involved in Patterson contours, Use of a, S. L. Brown and L. L. Wheeler—30
Mensuration, Proposal for the extension of our system of, E. C. Bingham—196(L); Errata—436(L)
Mercury, Radioactive mercury in mercury-vapor measurements, J. W. Irvine, Jr., and C. Goodman—496

Metallic films and the action of bearing metals, Lubrication by thin, F. P. Bowden and D. Tabor—141
Metallic films by means of the electron microscope, Studies on the structure of thin, R. G. Picard, and O. S. Duffendack—291
Metals and a calibrated series of aluminum alloys, A tension-compression device for quantitative x-ray diffraction evaluation of strain in, G. L. Clark, G. Pish, and R. Seabury—284
Metals, Luminescence of valve metals during electrolytic oxidation, S. Anderson—601
Metals, Ploughing and adhesion of sliding, F. P. Bowden, A. J. W. Moore, and D. Tabor—80
Metals, Ploughing and adhesion of sliding, J. J. Bikerman—436(L)
Micrographs of silica surface replicas, Interpretation of electron, R. D. Heidenreich—312
Microscope, A compact high resolving power electron, V. K. Zworykin and J. Hillier—658
Microscope, Early history of the electron, R. Rudenberg—434(L)
Microscope, Fine structure of metallic surfaces with the electron, R. D. Heidenreich and V. G. Peck—23
Microscope, Magnification calibration of the electron, E. F. Fullam—677
Microscope, Some applications of the high resolving power of the electron, H. Green and E. F. Fullam—332
Microscope, Studies on the structure of thin metallic films by means of the electron, R. G. Picard and O. S. Duffendack—291
Microscopy, Bibliography of electron, C. Marton and S. Sass—522
Microscopy, Electrostatic electron, C. H. Bachman and S. Ramo, I—8; II—69; III—155
Mixtures and its infra-red application, Spectrophotometric method for the analysis of multicomponent, R. R. Brattain, R. S. Rassmussen, and A. M. Cravath—418
Mercury, The structure of liquid—465 (résumé)
Mobilization of scientific resources, E. Hutchisson—203; II—311; III—373
Modern physics, The "particles" of, J. D. Stranathan—365 (review)
Molecules, The chemistry of large, Frontiers in chemistry, Volume I, edited by R. B. Burk and O. Grummitt—563 (review)
Molecules, The forces between hydrogen—633 (résumé)
Molecules, Viscosity of dilute solutions of long-chain molecules. V. Dependence on the solvent, M. L. Huggins—246
Murray Hill laboratory of Bell telephone laboratories, New, F. L. Hunt—249
Mutual impedance of antennas, A note on the, C. W. Harrison, Jr.—306

National academy of sciences, R. V. Hutchisson—374
National advisory committee on aeronautics, R. V. Hutchisson—399
National headquarters building for physics, A—442
National headquarters for physicists, A, Henry A. Barton—499
National inventor's council, R. V. Hutchisson—385
National research council, R. V. Hutchisson—378
National roster of specialized and scientific personnel, R. V. Hutchisson—380
Nebulae, New studies on extragalactic—20 (résumé)
Negative resistance as a machine parameter, G. H. Fett—674
Non-linear, A treatment of, devices based upon the theory of related linear functions, H. Stockman—645
Nuclear physics, Applied, E. Pollard and W. L. Davidson, Jr.—366 (review)

Oceans, The, H. U. Sverdrup, M. W. Johnson, and R. Fleming—220 (review)
Office of production research and development, R. V. Hutchisson—396
Office of scientific research and development, R. V. Hutchisson—388
Oscillations, Electrical circuit analysis of torsional, L. A. Pipes—352
Operational calculus to the theory of structures, Applications of the, L. A. Pipes—486
Oxidation, Luminescence of valve metals during electrolytic, S. Anderson—601
Oxide-coated cathode, Thermionic emission from an, H. Y. Fan—552

"Particles" of modern physics, The, J. D. Stranathan—365 (review)
Patterson contours, Use of a mechanical synthesizer to solve trigonometric and certain types of transcendental equations, and for the double summations involved in, S. L. Brown and L. L. Wheeler—30
Penetrometer method for determining the flow properties of high viscosity fluids, W. W. Pendleton—170; Errata—551
Photographic action of electrons in the range between 40 and 212 kilovolts, Erratum, R. F. Baker, E. G. Ramberg, and J. Hillier—39
Photographic method, Harmonic analysis by, A. W. Straiton and G. K. Terhune—535
Photographic process, The theory of the, C. E. Kenneth Mees—407 (review)
Physical tables, Miscellaneous—Planck's radiation functions and electronic functions, prepared by Federal Works Agency, W.P.A. for the City of New York, A. Lowan, Tech. Director—369 (review)
Physical procedures used in ceramic research, Some, G. A. Bole and G. A. Loomis—443
Physics, Book of elementary, R. B. Lindsay—563 (review)
Physics and philosophy, Sir James Jeans—465 (review)
Physics building. I. Early history of the building, The American Institute of, R. V. Hutchisson—501
Physics in 1942, T. H. Osgood—53
Ploughing and adhesion of sliding metals, J. J. Bikerman—436(L)

Planck's radiation functions and electronic functions, Miscellaneous physical tables, prepared by Federal Works Agency, W.P.A. for the City of New York, A. Lowan, Tech. Director—369 (review)
Ploughing and adhesion of sliding metals, F. P. Bowden, A. J. W. Moore, and D. Tabor—80
Poisson's exponential binomial limit. Table I—Individual terms; Table II—Cumulated terms, E. C. Molina—222 (review)
Polarization, Electron—271 (résumé)
Polystyrene, The apparent second-order transition point of, H. Mark, T. Alfrey, and G. Goldfinger—700
Potential theory, Two-dimensional boundary value problems in, I. S. Sokolnikoff and R. D. Specht—91
Powdered iron cores, A. Crossley—451
Pressures, Time lag of impulse breakdown at high, J. D. Cobine and E. C. Easton—321
Production research and development, Office of, R. V. Hutchisson—396

Radiation field of long wires, with application to vee antennas, C. W. Harrison, Jr.—537
Radiation functions and electronic functions, Miscellaneous physical tables—Planck's, prepared by Federal Works Agency, W.P.A. for the City of New York, A. Lowan, Tech. Director—369 (review)
Radio and television terms, Dictionary of, R. Stranger—166 (review)
Radioactive decay, High centrifugal fields and—271 (résumé)
Radioactive mercury in mercury-vapor measurements, J. W. Irvine, Jr., and C. Goodman—496
Radioactivity, The interior of the earth viewed in relation to earthquake causes. II. What radioactivity tells us about the interior of the earth, V. F. Hess—116
Radiosulfur tracer study of sulfurized lubrication addition agents, G. L. Clark, S. G. Gallo, and B. H. Lincoln—428
Rayon yarn, Flow and recovery properties of viscose, J. J. Press—224; Errata—464
Reactance of square tubular conductors, New formulas for the inductance and, T. J. Higgins—185
Recovery properties of viscose rayon yarn, Flow and, J. J. Press—224; Errata—464
Relativity, Introduction to the theory of, P. G. Bergmann—367 (review)
Report of War Policy Committee, Third. Wartime Training in Physics. American Institute of Physics, O. E. Buckley, K. T. Compton, H. L. Dodge, R. C. Gibbs, P. E. Klopsteg, and H. A. Barton—1
Resistance as a machine parameter, Negative, G. H. Fett—674
Resistances, Two new hot-filament, C. C. Minter—49
Resolving power of the electron microscope, Some applications of the high, H. Green and E. F. Fullam—332
Resonators containing several dielectric media, Cylindrical cavity—363 (résumé)
Rheological properties of colloidal solutions, pigment suspensions, and oil mixtures, R. N. Weltmann and H. Green—569
Roots of $J_n'(x)N_n'(kx) - J_n'(kx)N_n'(x) = 0$, Concerning the, R. Truell—350
Roster, National, of specialized and scientific personnel, R. V. Hutchisson—380
Rubber, Theory of filler reinforcement in natural and synthetic, the stresses in and about the particles, J. Rehner, Jr.—638

Saint-Venant's torsion problem, Approximate mathematical methods of applied physics as exemplified by application to, T. J. Higgins—469; Erratum—705
Scattering medium, Distribution of light intensity within a, R. R. Newton—481
Science remakes our world, J. Stokley—365 (review)
Scientific research and development, Office of, R. V. Hutchisson—388
Scientific resources, Mobilization of, E. Hutchisson—203; II—311; III—373
Seismology, The interior of the earth viewed in relation to earthquake causes. III. What seismology can tell us about the structure of the earth's interior, E. A. Hodgson—121
Short-circuit stresses in bus supports for rectangular tubular conductors, New formulas for, T. J. Higgins—151
Silica surface replicas, Interpretation of electron micrographs of, R. D. Heidenreich—312
Sliding metals, Ploughing and adhesion of, F. P. Bowden, A. J. W. Moore, and D. Tabor—80
Sliding metals, Ploughing and adhesion of, J. J. Bikerman—436(L)
Solutions, Viscosity of dilute solutions of long-chain molecules. V. Dependence on the solvent, M. L. Huggins—246
Stick-slip process, Studies in lubrication. XII. Friction behavior during the slip portion of the, J. B. Sampson, F. Morgan, D. W. Reed, and M. Muskat—689
Specifications, A.S.T.M. new standard, American Society for Testing Metals—138 (review)
Spectrochemical analysis, Modern, E. K. Jaycox—619
Spectrophotometric method for the analysis of multicomponent mixtures and its infra-red application, R. R. Brattain, R. S. Rassmussen, and A. M. Cravath—418
Statistical mathematics, A. C. Aitken—223 (review)
Statistical theory of liquids—165 (résumé)
Strain in metals and a calibrated series of aluminum alloys, A tension-compression for quantitative x-ray diffraction evaluation of, G. L. Clark, G. Pish, and R. Seabury—284
Stresses in and about the particles, Theory of filler reinforcement in natural and synthetic rubber, J. Rehner, Jr.—638
Stresses in bus supports for rectangular tubular conductors, New formulas for short-circuit, T. J. Higgins—151
String, Resolution of boundary value problems by means of the finite Fourier transformation: General vibration of a, H. K. Brown—609
Structure as function of time, Breakdown of thixotropic, R. N. Weltmann—343

Structure of liquid mercury, The—465 (résumé)
Structure of liquid xenon, The—632 (résumé)
Structures, Applications of the operational calculus to the theory of, L. A. Pipes—486
Sulfurized lubrication addition agents, Radiosulfur tracer study of, G. L. Clark, S. G. Gallo, and B. H. Lincoln—428
Surface replicas, Interpretation of electron micrographs of silica, R. D. Heidenreich—312
Surfaces, Fine structure of metallic surfaces with the electron microscope, R. D. Heidenreich and V. G. Peck—23
Surge-generator circuits, E. Fisher—341
Suspensions, Theory of vehicle, Errata, P. E. Mercier—51
Synthesizer to solve trigonometric and certain types of transcendental equations, and for the double summations involved in Patterson contours, S. L. Brown and L. L. Wheeler—30

Tables of functions, E. Jahnke and F. Emde—634 (review)
Tantalum ribbons, Controlled crystal growth in, B. A. Mrowca, C.S.C.—684
Tectonophysics, The interior of the earth viewed in relation to earthquake causes. V. Tectonophysics or the physics of earth deformation, J. B. Macelwane, S. J.—131
Television terms, Dictionary of radio and, R. Stranger—166 (review)
Temperature behavior of journal bearing systems, Studies in lubrication. XI, M. Muskat and F. Morgan—234
Tension-compression device for quantitative x-ray diffraction evaluation of strain in metals and a calibrated series of aluminum alloys, G. L. Clark, G. Pish, and R. Seabury—284
Tensor analysis for electrical engineers, A short course in, G. Kron—36 (review)
Terrestrial, The interior of the earth viewed in relation to earthquake causes. IV. Measurements of terrestrial magnetism tell us little about the interior of the earth, W. A. Lynch—127
Thermionic emission from an oxide-coated cathode, H. Y. Fan—552
Thermodynamics, The interior of the earth viewed in relation to earthquake causes. VI. What we learn from thermodynamics. Summary, J. Lynch, S. J.—134
Thin metallic films by means of the electron microscope, Studies on the structure of, R. G. Picard and O. S. Duffendack—291
Thixotropic structure as function of time, Breakdown of, R. N. Weltmann—343
Time lag of impulse breakdown at high pressures, J. D. Cobine and E. C. Easton—321
Torsion combined with compression, On, P. W. Bridgman—273
Torsional oscillations, Electrical circuit analysis of, L. A. Pipes—352
Tracer study of sulfurized lubrication addition agents, Radiosulfur, G. L. Clark, S. G. Gallo, and B. H. Lincoln—428
Transient analysis of linear systems, M. F. M. Osborne—180
Transmission-line theory and its application, R. King—577

Van der Pol's and certain related types of non-linear differential equations, homogeneous and non-homogeneous, New analytical method for solving, J. Shohat—40
Vee antennas, Radiation field of long wires with application to, C. W. Harrison, Jr.—537
Vehicle suspensions, Theory of, Errata, P. E. Mercier—51
Vibration characteristics of "free-free" circularly curved bars, W. A. Pliskin, J. E. Edwards, and F. P. Bundy—410
Viscose rayon yarn, Flow and recovery properties of, J. J. Press—224; Errata—464
Viscosity of dilute solutions of long-chain molecules, V. Dependence on the solvent, M. L. Huggins—246
Viscosity fluids, Penetrometer method for determining the flow properties of high, W. W. Pendleton—170; Errata—551
Viscous fluids, Fundamental problem of the theory of, H. Putman—244
Vision, Evolution of color, G. L. Walls—161

Wartime training in physics, American Institute of Physics, Third report of War Policy Committee, O. E. Buckley, K. T. Compton, H. L. Dodge, R. C. Gibbs, P. E. Klopsteg, and H. A. Barton—1
What is mathematics, R. Courant and H. Robbins—366 (review)
Wires, Radiation field of long wires with application to vee antennas, C. W. Harrison, Jr.—537

Xenon, The structure of liquid—632 (résumé)
X-ray camera, High temperature—137 (résumé)
X-ray diffraction evaluation of strain in metals and a calibrated series of aluminum alloys, A tension-compression device for quantitative, G. L. Clark, G. Pish, and R. Seabury—284
X-ray, Probable x-ray mass absorption coefficients for wave-lengths shorter than the K critical absorption wave-length, J. A. Victoreen—95

Yarn, Flow and recovery properties of viscose rayon, J. J. Press—224; Errata—464

CONTENTS

JANUARY, 1943

Wartime Training in Physics. Third Report of War Policy Committee of the American Institute of Physics, December 7, 1942 1
Electrostatic Electron Microscopy. I . . . . . C. H. BACHMAN AND SIMON RAMO 8
Résumés of Recent Research 19
Fine Structure of Metallic Surfaces with the Electron Microscope . . . . . R. D. HEIDENREICH AND V. G. PECK 23
Use of a Mechanical Synthesizer to Solve Trigonometric and Certain Types of Transcendental Equations, and for the Double Summations Involved in Patterson Contours . . . . . S. LEROY BROWN AND LISLE L. WHEELER 30
Note on the Annealing of Glass . . . . . W. A. WEYL AND A. G. PINCUS 37
Erratum: The Photographic Action of Electrons in the Range Between 40 and 212 Kilovolts . . . . . R. F. BAKER, E. G. RAMBERG, AND J. HILLIER 39
New Analytical Method for Solving van der Pol's and Certain Related Types of Non-Linear Differential Equations, Homogeneous and Non-Homogeneous . . . . . J. SHOHAT 40
Two New Hot-Filament Resistances . . . . . CLARKE C. MINTER 49
Errata: Theory of Vehicle Suspensions . . . . . PIERRE ERNEST MERCIER 51

Here and There 21
New Books 36

FEBRUARY, 1943

Physics in 1942 . . . . . THOMAS H. OSGOOD 53
Electrostatic Electron Microscopy II . . . . . C. H. BACHMAN AND SIMON RAMO 69
Ploughing and Adhesion of Sliding Metals . F. P. BOWDEN, A. J. W. MOORE, AND D. TABOR 80
Two-Dimensional Boundary Value Problems in Potential Theory I. S. SOKOLNIKOFF AND R. D. SPECHT 91
Probable X-Ray Mass Absorption Coefficients for Wave-Lengths Shorter Than the K Critical Absorption Wave-Length . . . . . JOHN A. VICTOREEN 95

New Books 77
Here and There 78

MARCH, 1943

Toward an Improved Professional Spirit Among Industrial Physicists 103
The Interior of the Earth Viewed in Relation to Earthquake Causes
I. What Geodesy Can Tell Us About Immediate and Ultimate Causes of Earthquake . . . . . NICHOLAS H. HECK 104
Discussion . . . . . M. KING HUBBERT 115
II. What Radioactivity Tells Us About the Interior of the Earth . . . . . VICTOR F. HESS 116
III. What Seismology Can Tell Us About the Structure of the Earth's Interior . . . . . ERNEST A. HODGSON 121
IV. Measurements of Terrestrial Magnetism Tell Us Little About Earthquakes but May Tell Us Much About the Interior of the Earth . . . . . WILLIAM A. LYNCH 127
V. Tectonophysics or the Physics of Earth Deformation . . . JAMES B. MACELWANE, S. J. 131
VI. What We Learn from Thermodynamics. Summary . . . . . JOSEPH LYNCH, S. J. 134
Résumé of Recent Research 137
Lubrication by Thin Metallic Films and the Action of Bearing Metals . . . . . F. P. BOWDEN AND D. TABOR 141
New Formulas for Calculating Short-Circuit Stresses in Bus Supports for Rectangular Tubular Conductors . . . . . THOMAS JAMES HIGGINS 151

Calendar of Meetings 114
New Instrument Booklets 137
New Books 138
Here and There 138

April, 1943

Electrostatic Electron Microscopy. III . . . . . C. H. Bachman and Simon Ramo 155
Evolution of Color Vision . . . . . Gordon L. Walls 161
Résumé of Recent Research 165
Penetrometer Method for Determining the Flow Properties of High Viscosity Fluids . . . . . Wesley W. Pendleton 170
Transient Analysis of Linear Systems . . . . . M. F. M. Osborne 180
New Formulas for the Inductance and Reactance of Square Tubular Conductors . . . . . Thomas James Higgins 185
Formulas for the Geometric Mean Distances of Rectangular Areas and of Line Segments . . . . . Thomas James Higgins 188

Letter to the Editor:

Proposal for the Extension of Our System of Mensuration . . . . . Eugene C. Bingham 196

New Books 166
Here and There 167
Calendar of Meetings 195
Innovations in Instruments 199
New Instrument Booklets 201

May, 1943

Mobilization of Scientific Resources 203
Frictional Phenomena. XIII . . . . . Andrew Gemant 204
Résumé of Recent Research 217
Flow and Recovery Properties of Viscose Rayon Yarn . . . . . Jack J. Press 224
Studies in Lubrication. XI. Temperature Behavior of Journal Bearing Systems . . . . . M. Muskat and F. Morgan 234
Fundamental Problem of the Theory of Viscous Fluids . . . . . Henri Putman 244
Viscosity of Dilute Solutions of Long-Chain Molecules. V. Dependence on the Solvent . . . . . Maurice L. Huggins 246

Calendar of Meetings 217
Here and There 218
New Books 220
Recent Applications of Physics viii
New Instrument Booklets xii

June, 1943

New Murray Hill Laboratory of Bell Telephone Laboratories . . . . . Franklin L. Hunt 249
Frictional Phenomena. XIV. . . . . . Andrew Gemant 258
Résumés of Recent Research 271
On Torsion Combined with Compression . . . . . P. W. Bridgman 273
A Tension-Compression Device for Quantitative X-Ray Diffraction Evaluation of Strain in Metals and a Calibrated Series of Aluminum Alloys . . . . . George L. Clark, George Pish, and Ralph Seabury 284
Studies on the Structure of Thin Metallic Films by Means of the Electron Microscope . . . . . Robert G. Picard and O. S. Duffendack 291
A Note on the Mutual Impedance of Antennas . . . . . Charles W. Harrison, Jr. 306

Here and There 309
Calendar of Meetings 310
Recent Applications of Physics x
New Instrument Booklets x

July, 1943

Mobilization of Scientific Resources, II 311
Interpretation of Electron Micrographs of Silica Surface Replicas . . . . . Robert D. Heidenreich 312
Time Lag of Impulse Breakdown at High Pressures . . . . . J. D. Cobine and E. C. Easton 321

Some Applications of the High Resolving Power of the Electron Microscope . . . . . Henry Green and Ernest F. Fullam 332
Surge-Generator Circuits . . . . . Edward Fisher 341
Breakdown of Thixotropic Structure as Function of Time . . . . . Ruth N. Weltmann 343
Concerning the Roots of $J_n'(x)N_n'(kx)-J_n'(kx)N_n'(x)=0$ . . . . . Rohn Truell 350
Electrical Circuit Analysis of Torsional Oscillations . . . . . Louis A. Pipes 352
Résumés of Recent Research 363

New Instrument Booklets 364
New Books 365
Here and There 370
Calendar of Meetings 372
Recent Applications of Physics viii
Innovations in Instruments x

August, 1943

Mobilization of Scientific Resources. III 373
National Academy of Sciences . . . . . R. V. H. 374
National Research Council . . . . . R. V. H. 378
National Roster of Specialized and Scientific Personnel . . . . . R. V. H. 380
National Inventors' Council . . . . . R. V. H. 385
Office of Scientific Research and Development . . . . . R. V. H. 388
Office of Production Research and Development . . . . . R. V. H. 396
National Advisory Committee on Aeronautics . . . . . R. V. H. 399
Vibration Characteristics of "Free-Free" Circularly Curved Bars . . . . . W. A. Pliskin, J. E. Edwards, and F. P. Bundy 410
Spectrophotometric Method for the Analysis of Multicomponent Mixtures and Its Infra-Red Application . . . . . R. Robert Brattain, R. S. Rassmussen, and A. M. Cravath 418
Radiosulfur Tracer Study of Sulfurized Lubrication Addition Agents . . . . . George L. Clark, S. George Gallo, and Bert H. Lincoln 428

Letters to the Editor:

Early History of the Electron Microscope . . . . . Reinhold Rüdenberg 434
Ploughing and Adhesion of Sliding Metals . . . . . J. J. Bikerman 436
Erratum: Proposal for the Extension of Our System of Mensuration . . . . . Eugene C. Bingham 436

Here and There 406
New Books 407
Innovations in Instruments 408
New Instrument Booklets 409
Calendar of Meetings 417

September, 1943

Current Trends in the American Physical Society 437
National Headquarters Building for Physics 442
Some Physical Procedures Used in Ceramic Research . . . . G. A. Bole and G. A. Loomis 443
Powdered Iron Cores . . . . . Alfred Crossley 451
Frictional Phenomena. XV . . . . . Andrew Gemant 456
Approximate Mathematical Methods of Applied Physics as Exemplified by Application to Saint-Venant's Torsion Problem . . . . . Thomas James Higgins 469
Distribution of Light Intensity within a Scattering Medium . . . . . Robert R. Newton 481
Applications of the Operational Calculus to the Theory of Structures . . . . . Louis A. Pipes 486
Radioactive Mercury in Mercury-Vapor Measurements . . . . . John W. Irvine, Jr., and Clark Goodman 496
Errata: Flow and Recovery Properties of Viscose Rayon Yarn . . . . . Jack J. Press 464

Calendar of Meetings 455
Résumé of Recent Research 465
New Books 465
Here and There 466
Recent Applications of Physics 467
Innovations in Instruments 468

OCTOBER, 1943

A National Headquarters for Physicists . . . . . HENRY A. BARTON 499
The American Institute of Physics Building. I. Early History of the Building . . . . . ROSE V. HUTCHISSON 501
Frictional Phenomena. XVI . . . . . ANDREW GEMANT 510
Bibliography of Electron Microscopy . . . . . CLAIRE MARTON AND SAMUEL SASS 522
Harmonic Analysis by Photographic Method . . ARCHIE W. STRAITON AND GEO. K. TERHUNE 535
Radiation Field of Long Wires, with Application to Vee Antennas . CHARLES W. HARRISON, JR. 537
Dosimetry and Local Distribution of Energy in the Electric High Frequency Field . . K. S. LION 545
Erratum: The Penetrometer Method for Determining the Flow Properties of High Viscosity Fluids . . . . . WESLEY W. PENDLETON 551
Thermionic Emission from an Oxide-Coated Cathode . . . . . H. Y. FAN 552

Calendar of Meetings 531
Here and There 532
Innovations in Instruments 533
New Instrument Booklets 533
Recent Applications of Physics 534

NOVEMBER, 1943

Rheological Properties of Colloidal Solutions, Pigment Suspensions, and Oil Mixtures . . . . . R. N. WELTMANN AND H. GREEN 569
Transmission-Line Theory and Its Application . . . . . RONOLD KING 577
Luminescence of Valve Metals During Electrolytic Oxidation . . . . . SCOTT ANDERSON 601
Resolution of Boundary Value Problems by Means of the Finite Fourier Transformation: General Vibration of a String . . . . . HERBERT KAPFEL BROWN 609

New Books 561
Here and There 566
Calendar of Meetings 618

DECEMBER, 1943

Modern Spectrochemical Analysis . . . . . EDWIN K. JAYCOX 619
Theory of Filler Reinforcement in Natural and Synthetic Rubber. The Stresses in and about the Particles . . . . . JOHN REHNER, JR. 638
Treatment of Non-Linear Devices Based upon the Theory of Related Linear Functions . . . . . HARRY STOCKMAN 645
Compact High Resolving Power Electron Microscope . . V. K. ZWORYKIN AND JAMES HILLIER 658
Negative Resistance as a Machine Parameter . . . . . G. H. FETT 674
Magnification Calibration of the Electron Microscope . . . . . ERNEST F. FULLAM 677
Controlled Crystal Growth in Tantalum Ribbons . . . . . B. ADALBERT MROWCA, C.S.C. 684
Studies in Lubrication. XII. Friction Behavior During the Slip Portion of the Stick-Slip Process . . . . . J. B. SAMPSON, F. MORGAN, D. W. REED, AND M. MUSKAT 689
Apparent Second-Order Transition Point of Polystyrene . . . . . T. ALFREY, G. GOLDFINGER, AND H. MARK 700
Erratum: The Approximate Mathematical Methods of Applied Physics as Exemplified by Application to Saint-Venant's Torsion Problem . . . . . THOMAS JAMES HIGGINS 705
Author Index to Volume 14 706
Subject Index to Volume 14 709
Volume Table of Contents III

Calendar of Meetings 631
Résumés of Recent Research 632
